Summary

AI & Machine Learning Specialist with experience in full-stack development, DevOps, Open Weight model, Skilled in building scalable FastAPI/Django systems, deploying CI/CD pipelines, and delivering business impact.

Work Experience

- AI Software Developer (ThorSignia)

Apr. 2025 – Aug. 2025

 - Developed AI-driven apps combining **ML, LLMs, and automation pipelines**.
 - Built **recommendation systems** and **translation workflows** using **Django, FastAPI, PostgreSQL**.
 - Created scalable **APIs** and deployments with **Docker** and **CI/CD**.
 - Collaborated on AI-powered **CRM** and **OCR** systems; Optimized OCR-based business-card scanner from 80% → 95% accuracy, improving real-time extraction speed by 40%
 - Integrated **generative AI** and automation (scheduling, webhooks, API-driven workflows).
- AI Lead(LushAITech Pvt. Ltd.)

Nov. 2025 – Present

 - Built AI chatbots and applications using LLMs, prompt engineering, and evaluation pipelines.
 - Integrated automation & translation APIs; implemented backends with **FastAPI** and **PostgreSQL**.
 - Designed and evaluated prompt strategies improving response quality.
 - Also working as DevOps with Amazon Web Services(AWS) maintaining end-to-end deployments.
 - Delivered end-to-end solutions including deployment (Docker, CI/CD) and API integrations.

Skills

- Programming:** Python, PostgreSQL, SQL
- AI & ML:** Machine Learning, Neural Networks, Generative AI, Prompt Engineering, LLM concept.
- Backend & Tools:** Django, FastAPI, Docker, Postman, PostgreSQL, PyTorch, Tensorflow, sklearn.
- Automation & Integration:** n8n, Make.com.
- Other Skills:** Full-Stack Development, API Integration, CI/CD, Facebook Graph.

Education

2023 – 2025	MCA at CMR University	(CGPA: 8.72/10.0)
2020 – 2023	BCA at Govt. Champhai College	(CGPA: 8.88/10.0)

Publications

Trapped in the Loop: The Pervasive Influence of Deep Neural Networks on Social Media.
<https://www.ijcrt.org/papers/IJCRT2508451.pdf>

Projects

Built and deployed an AI-powered platform, LushAIChat, using FastAPI-based AI microservices for scalable inference and API orchestration. Integrated LLM-driven features with a modern web stack, focusing on performance, modular architecture, and real-time user interaction.

Contributed to Healthy Lunglei, DiasporaHub, SmartVC, lushaigent by integrating a semi-agentic AI assistant capable of handling appointment bookings and user interactions. Improved response quality and reliability through evaluation pipelines (Evals), enhancing the overall AI performance within the healthcare application.
